The BMW S54 engine is the high-power variant of the M54 engine, used in the E46 M3, Z3M and early year Z4M's. While the S54 is the big brother to the M54, it was actually built and improved off of the S50 engine, its predecessor from the E36 M3. Compared to the S50, the S54 was increased to 3.25L from 3.0L, it was upgraded from single to dual vanos, compression ratios increased, and a few other technical specs were improved.

At the heart of the E46 M3 was the 333-horsepower S54B32 engine, an evolution of an architecture that reaches back to the original M53Si and M1. The S54 won multiple engineering awards upon its release and, at the time, it produced the highest horsepower-per-liter for a normally aspirated production engine.

I got a 2002 bmw e46 M3 Engine with 140k miles on it. It works fine I drove it for a while but I mainly bought the car to strip it apart and rebuild it with a different engine. Building it to be a drift missile so I wanted to put a different engine in it and manual swap it. Besides that it works just didn't want to use the engine or transmission.

**BMW 2002 FAQ**

The BMW M54 is a naturally aspirated straight-6 petrol engine produced from 2000 to 2006. It was released in the E53 X5 and is the replacement for the M52 engine. The S54 is the equivalent high performance engine, used in the E46 M3, the Z3 M Coupé/Roadster and the E85 Z4 M. The BMW M56 SULEV engine is based on the M54. The M54 was phased out following the introduction of the BMW N52 engine in 2004. From 2001 to 2003, the M54 was included on the Ward's 10 Best Engines list.

Few enthusiasts will refute the majestic appeal of BMW's E46 M3 S54 powerplant. It featured individual throttle bodies, variable valve timing, 333 horsepower, and an 8,000 rpm redline. But like most race bread engines designed for street use, they had their own problems...especially as the mileage accrued.

**Building a Bulletproof BMW S54 M3 Engine with Michael Esso**

The M Coupe and M Roadster are powered by the BMW S54 straight-six engine from the E46 M3. The engine has fly-by-wire throttle and double VANOS (variable valve timing). In most countries, the engine is rated at 252 kW (338 hp) at 7,900 rpm and 365 N⋅m (269 lb⋅ft) at 4,900 rpm—the same outputs as in the M3. The engine has a redline of 8,000 rpm.

Hello everyone, I have a S54 engine that I brought to rebuild for a turbo build but plans changed and I'm going a different route. I dissembled the engine and have it in separate pieces ready for the machine shop. Engine came out of a 2005 or 2006 e46 m3, can't remember the year, only had 90,xxx miles on it upon removal from the previous owner.

The E46 M3 beauty is truly timeless and arguably the best BMW M3 ever made. The S54 high revving engine redlines at 8,000 rpm producing 343hp without the aid of forced induction. Although the S54 is a well engineered engine, it does have some flaws and Vanos is top of the list.

This is the OEM NGK spark plug used in the S54 engine in the E46 M3, MZ3 S54, and Z4M Roadster/Coupe. Just like ignition coils, spark plugs are key to the performance and efficiency of your BMW engine. A bad plug(s) will harm performance and fuel mileage and affect drivability and engine smoothness.
