Burris Eliminator Iii Manual

The Burris tactical line of scopes and sights are optics designed for situations where there is no tolerance for failure: law enforcement work, facing a threat to your personal protection, or competing in a 3 gun or long-range competition. They also can pull double duty as a hunting scope. Whatever the use, the goal is the same: absolute accuracy and unflinching reliability.

Mounting the Burris Eliminator III - I Am Hunter

Had a Burris Eliminator III and sold it because the range-finding was "twitchy", and it wouldn't deliver a firing solution past 800-ish yards. Waited and watched for an Eliminator IV when I heard it had improved technology and ranged out to 2,000 yards. One popped at Sportsman's Warehouse and I grabbed it. Received it early this week, and used it for the first time this morning. Here's what I ...

The manual adjustments also came in handy in the next trial, out to 1,000 yards. While the Eliminator III's maximum LED range is 1,200 yards, it only applies to flatter-shooting rounds. With my .308 load, starting off at about 2700 fps, the longest-distance dot to light up was at 800 yards.

engineer, or other technical professional-would need to select, size, and estimate "budget/study" level capital and annual costs for a variety of air pollution control equipment. This equipment includes wet scrubbers, carbon adsorbers, and other "add-on" devices. This book also deals with such nonstack controls as wet dust suppression systems and flue gas desulfurization systems. The costs are current (1988 or 1989 dollars) and are mainly presented in equational form for ease of computerization and updating. Clear, comprehensive equipment sizing procedures are also detailed. Finally, several detailed example problems are included to illustrate the sizing and costing procedures. This book

is not just for technical personnel, however. The material is easy to grasp and use. Anyone with an air pollution control background can follow and apply the procedures and data herein. Using this book, air pollution control professionals can now develop sound, defensible (within $\pm 30\%$) cost estimates with a minimum of time and effort.
