On July 6, 2003, four months after the United States invaded Iraq, former ambassador Joseph Wilson's now historic op-ed, "What I Didn't Find in Africa," appeared in The New York Times. A week later, conservative pundit Robert Novak revealed in his newspaper column that Ambassador Wilson's wife, Valerie Plame Wilson, was a CIA operative. The public disclosure of that secret information spurred a federal investigation and led to the trial and conviction of Vice President Dick Cheney's chief of staff, Scooter Libby, and the Wilsons' civil suit against top officials of the Bush administration. Much has been written about the "Valerie Plame" story, but Valerie herself has been silent, until now. Some of what has been reported about her has been frighteningly accurate, serving as a pungent reminder to the Wilsons that their lives are no longer private. And some has been completely false -- distorted characterizations of Valerie and her husband and their shared integrity. Valerie Wilson retired from the CIA in January 2006, and now, not only as a citizen but as a wife and mother, the daughter of an Air Force colonel, and the sister of a U.S. marine, she sets the record straight, providing an extraordinary account of her training and experiences, and answers many questions that have been asked about her covert status, her responsibilities, and her life. As readers will see, the CIA still deems much of the detail of Valerie's story to be classified. As a service to readers, an afterword by national security reporter Laura Rozen provides a context for Valerie's own story. Fair Game is the historic and unvarnished account of the personal and international consequences of speaking truth to power.

This is a critical study of the major novels and short stories of Minako Oba (1930-) the undisputed leader in the resurgence of women writers in Japan. Oba is a postmodernist, rethinking gender and culture, encompassing the theme of female Bildungsroman, and drawing on marinated memories.

This brand-new volume in the best-selling "Case Review" series uses more than 200 case studies to challenge your knowledge of a full range of topics in emergency radiology, including MDCT-A of vascular injury, CT and MR of spinal injuries, CT and MRI of CNS emergencies, and subtle and classic CT signs of bowel emergencies. It is your ideal concise, affordable, and user-friendly tool for self assessment in this specialty! With its soft-cover format, easy-access organization, and high-quality images, Emergency Radiology goes a long way toward alleviating exam anxiety and sharpening your clinical skills. Discusses the classic appearance of a range of emergent imaging pathology and key points concerning diagnoses to promote rapid, appropriate treatment of acute illnesses. Organizes case studies into "Opening Round," "Fair Game," and "Challenge" sections that present varying levels of difficulty. Mirrors the format and content of the American Board of Radiology's oral exam, and offers case studies similar to those found on exams, to give you realistic preparation for the test-taking experience. Features more than 500 high-quality, state-of-the-art images representing a wide range of clinical situations encountered in the field. Incorporates the most recent knowledge from the literature in this field, and offers 200 case studies, to make sure your skills are completely up to date. Groups cases by topic for a more efficient, targeted review of information.

Get the background you need and discover the usefulness of mathematics in analyzing and solving problems with FINITE MATHEMATICS, 8th Edition. The author clearly explains concepts, and the computations demonstrate enough detail to allow you to follow and learn steps in the problem-solving process. Hundreds of examples and exercises, many based on real-world data, illustrate the practical applications of mathematical concepts. The book also includes technology guidelines to help you successfully use graphing calculators and Microsoft Excel to solve selected exercises. Available with InfoTrac Student Collections http://goencange.com/infotrac. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Pediatric Imaging: Case Review, by Thierry A.G.M. Huisman, MD, tests your ability to interpret a wide range of images seen in practice. The completely revised edition of this title in the popular Case Review series features all-new cases and superb-quality accompanying images that explore the newest imaging modalities, including the newest technology in post processing such as lung reconstruction and tractography of fibers within the brain. This complete study of pediatric imaging has been reorganized anatomically for quick reference and easy board review. This book contains approximately 200 cases—organized by difficulty—and 400 images—with questions and answers, diagnoses, commentary, references, and cross-references to Pediatric Radiology: The Requisites. Study effectively with content that mimics the format of official exams as well as the everyday clinical experience—offering highly effective preparation for certification, recertification, and practice. Distinguish between common and rare diagnoses with 200 case studies organized into "Opening Round," "Fair Game," and "Challenge" sections that present varying levels of difficulty and occurrences. Clearly see and interpret 400 high-quality, state-of-the-art images representing a wide range of clinical situations encountered in pediatric imaging. Supplement your Pediatrics board prep and get greater depth of information with easy cross-referencing to companion Get a fresh perspective from 200 new cases reflecting the most recent changes in pediatric imaging, including the newest technology in post processing such as lung reconstruction and tractography of fibers within the brain, and expert guidance from new editor Dr. Thierry Huisman, Director of Pediatric Radiology at Johns Hopkins. Spend less time searching and more time learning with easy-to-navigate chapters focused on visual identification and diagnosis, and reorganized by degree of case difficulty and then by body part within each category.

Jez Butterworth is the most critically acclaimed and commercially successful new British dramatist of the 21st century: his acclaimed play Jerusalem has had extended runs in the West End and on Broadway. This book is the first to examine Butterworth's writings for stage and film and to identify how and why his work appeals so widely and profoundly. It examines the way that he weaves suspenseful stories of eccentric outsiders, whose adventures echo widespread contemporary social anxieties, and involve surprising expressions of both violence and generosity. This book reveals how Butterworth unearths the strange forms of wildness and defiance lurking in the depths and at the edges of England: the most unpredictably outbursts of humour highlight the intensity of life, and characters discover links between their haunting past and the uncertainties of the present, to create a meaningful future. Supplemented by essays from James D. Balesrieri and Elisabeth Angel-Perez, this is a clear and detailed source of reference for a new generation of theatre audiences, practitioners and directors who wish to explore the work of this seminal dramatist.

The Equality Act 2010 in Mental Health provides a critical guide to the Act: what it means for mental health services and how it should be implemented. It addresses each of the nine characteristics protected by the Act in turn, examining the research and practice issue associated with each and offering positive guidance. Contributors also highlight the broader issues associated with achieving equality in mental health, including conflicts between different forms of discrimination, the impact of budget cuts and the issue of inequality in wider society and how it relates to the mental health services. Finally, the book tackles organisational change and the implications for management practice, organisational structures and staff training. This book will be a valuable resource for those involved in providing mental health services, including managers and frontline workers across health and social care.
