Yeohlee Teng - Wikipedia

Foot binding was the Chinese custom of breaking and tightly binding the feet of young girls in order to change the shape and size of their feet; during the time it was practiced, bound feet were considered a status symbol and a mark of beauty. Feet altered by foot binding were known as lotus feet, and the shoes made for these feet were known as lotus shoes.

Explores the historical significance of Chinese clothing, and offers examples and commentary on fashions ranging from the dragon robes of the Imperial era to the cheongsams shown on the runways in Paris

China Chic is the first book to explore the evolution of Chinese dress, from the dragon robes and lotus shoes of the imperial era to the creation of new fashions like the cheongsam and the "Mao suit" that symbolised modern Chinese identity. For China specialists, the focus on fashion will open up an entirely new way of thinking about modern Chinese culture and society. For readers whose primary interest is fashion, China Chic demolishes the Eurocentric myth of an ancient, unchanging mode of dress.

East meets West in this award-winning book of Chinese style by superstar fashion designer Vivienne Tam—and now it's in a cute, smaller trim size trade paperback! Celebrated fashion designer Vivienne Tam shares the rare individuality of her own cross-cultural style, combining traditional eastern elements with a modern Western edge. The seductive East-meets-West style is brought alive as Tam takes us on a personal journey featuring the people, places, and things that inspire her. From the sexy cheongsam (the ultimate feminine dress) to the Mao jacket (gives power dressing a whole new meaning), from the elaborate Chinese opera houses to Zen gardens, she teaches such us how to savour the world in a bowl of noodles and the essence of Chinese design in her favourite Ming chair. China Chic is style that is hot, hip, and pervasive to today's—and tomorrow's—pop culture.

Based largely on nineteenth and twentieth-century representations of Chinese dress as traditional and unchanging, historians have long regarded fashion as something peculiarly Western. But in this surprising, sumptuously illustrated book, Antonia Finnane proves that vibrant fashions were a vital part of Chinese life in the late imperial era, when well-to-do men and women showed a keen awareness of what was up-to-date. Though foreigners who traveled to China in the early decades of the twentieth century came away with the impression that Chinese dress was simple and monotone, the key features of modern fashion were beginning to emerge, especially in Shanghai. Men in blue gowns donned felt caps and leather shoes, girls began to wear fitted jackets and narrow pants, and homespun garments gave way to machine-woven cloth, often made in foreign lands. These innovations marked the start of a far-reaching vestimentary revolution that would transform the clothing culture in urban and much of rural China over the next half century. Through Finnane's meticulous research, we are able to see how the close-fitting jacket and high collar of the 1911 Revolutionary period, the skirt and jacket-blouse of the May Fourth era, and the military style popular in the Cultural Revolution led to the variegated, globalized wardrobe of today. She brilliantly connects China's modernization and global visibility with changes in dress, offering a vivid portrait of the complex, subtle, and sometimes contradictory ways the people of China have worn their nation on their backs.

Tells the remarkable story of Chicago women who purchased and wore high fashion in the hope of claiming Chicago as chic.

This work provides a look behind the closed doors of Hong Kong's most extravagant and unusual homes, revealing the interior style that has given the island its reputation for excess, exoticism, and masterly application of East-meets-West aesthetics.

Tang dynasty (618–907) China hummed with cosmopolitan trends. Its capital at Chang'an was the most populous city in the world and was connected via the Silk Road with the critical markets and thriving cultures of Central Asia and the Middle East. In *Empire of Style*, Bu'Yun Chen reveals a vibrant fashion system that emerged through the efforts of Tang artisans, wearers, and critics of clothing. Across the empire, elite men and women subverted regulations on dress to acquire majestic silks and au courant designs, as shifts in economic and social structures gave rise to what we now recognize as precursors of a modern fashion system: a new consciousness of time, a game of imitation and emulation, and a shift in modes of production. This first book on fashion in premodern China is informed by archaeological sources—paintings, figurines, and silk artifacts—and textual records such as dynastic annals, poetry, tax documents, economic treatises, and sumptuary laws. Tang fashion is shown to have flourished in response to a confluence of social, economic, and political changes that brought innovative weavers and chic court elites to the forefront of history.
