This book is the tenth volume in a series titled " Contemporary Logistics in China, " authored by researchers from the Logistics Research Center at Nankai University. In the spirit of the nine preceding annual volumes, this book carries on the tenet of providing a systematic exposition of the logistics development in China for the English-speaking community at large. In particular, this volume captures China 's ever-progressing logistics development over the past four decades of " reform and opening " directives and reflects on the technological advancement and systemic reformation. Subjects covered in this volume encompass the macro-factors pertaining to the overall development in logistics technologies and facilities, region-specific policies and plans, industry-wide transformation in manufacturing, commerce, agriculture, and supply chain logistics. Specifically, it describes the innovation in supply chain service and the application of intelligent logistics in China in 2018, and recounts the evolution and expansion of the logistics functionalities in the Free Trade Zones in recent years. The expositions on and analyses of these subjects are based on the latest available sources and statistical data. As with the previous volumes, the ultimate aim of this book is to present a timely portrait of the rapid growth of China 's logistics market and the status quo of its logistics industry. In so doing, the book attempts to afford an in-depth analysis of critical issues pertaining to the ongoing, dynamic and multi-faceted development, and provide a valuable reference to interested readers in the academic and professional fields.

Both academia and the real world are showing a vastly increased interest in international logistics. Although this book covers the entire topic, it may not contain sufficient detail to answer all questions. The topic-and the challenge is much larger than any single book can cover! A number of people helped us, and their assistance should be recognized. They include Robert L. Argentieri, Eunice Coleman, Patricia J. Daugherty, Robert Derbin, Robert Hannus, Ken Knox, Douglas Long, Eugene L. Magad, Dale S. Rogers, Robert Rouse, John Silvey, and Clyde Kenneth Walter. This book is designed for both the business world and the classroom. A separate Instructor's Manual has been prepared and may be requested on school letterhead from Chapman & Hall. International Logistics 1 Introduction This book is about international logistics and the international logistics system. International means that it will deal with transactions involving individuals or firms in more than one nation. International means that it will deal with transactions involving individuals or firms in more than one nation. Logistics means the organized movement of goods, services, and, sometimes, people. Logistics was originally a military term. For example, in author Tom Clancy's novel, Red Storm Rising, Russian General Aleksyev thought to himself about a battlefield situation: "The tactics ... no, amateurs discuss tactics. Professional soldiers study logistics. ..." When one speaks of the international logistics system, he means that huge array of carriers, forwarders, bankers, traders, and so on that facilitate international transactions, trades, and movements of goods and services. Communications are important, and a logistics system includes whatever communication capability it needs.
