Drag the object close to the target object until the snap point on the target object becomes highlighted. To snap an object as you draw it, drag in the drawing window until the snap point in the target object becomes highlighted. To set snapping options. 1. Click ToolsOptions.

CorelDRAW Help | Snapping objects

There is a known bug (think it was discussed some weeks ago) where if a group is selected, only the topmost object in the group snaps to the guidelines. If the same objects are selected but not grouped however, only the object at the bottom of the stack snaps to the guidelines. Maybe this is what you are seeing? 0 Tracey over 1 year ago

Not working: grouped objects snap to gidelines - CorelDRAW ...

Snapping objects. When you move or draw an object, you can snap it to another object in a drawing. You can snap an object to a number of snap points in the target object. When the pointer is close to a snap point, the snap point is highlighted, indicating it as the pointer's snapping target. To snap an object to another object with greater precision, you first snap the pointer to a snap point in the object, and then snap the object to a snap point in the target object.
