LEARNING TO THINK THINGS THROUGH

The metacurriculum is integrated with the curriculum, meaning that the skills are selected and instruction in them "scheduled" so they are directly applicable to learning the content being studied in a particular grade or subject: connections are made clear to students. The metacurriculum is integrated across subjects. For elementary teachers in "self-contained" classrooms, this means teaching the same learning skills in several subjects, highlighting similarities and differences.

Integrating Thinking and Learning Skills Across the Curriculum

Critical Thinking across the Curriculum: Developing ...

Why Is Critical Thinking Important in Curriculum Development? Once the district chooses educational products from a publisher, teachers have little control over what textbooks, manipulatives, multimedia access and student materials reach the classroom. Learning standards, objectives and district-wide assessments are rarely negotiable.

Importance of Critical Thinking in Curriculum Development

The assessment of critical thinking can be greatly improved as faculty identify needs, goals, and a conception of critical thinking and integrate this information with known assessment strategies.

Assessing critical thinking across the curriculum ...

Critical thinking in the UK's curriculum has been approached mainly through a psychological perspective focused on mental or cognitive processes embedded in subject matter running across the curriculum (Higgins, 2014) giving only a minimal place to standalone CT programs (Moseley et al., 2005, p. 27; Department for Education, 2014) and showing, therefore, emphasis on traditional academic disciplines and traditional thinking lines, rather than on alternative perspectives of thinking and ...
