Brilliant ... crammed with wisdom and insight.' Stephen Fry on Happy In A Little Happier Derren Brown draws out the essential discoveries from his international bestseller Happy to help you lead your happiest life. Life is hard, messy and complex. But if we can learn to separate what we can control - our thoughts and actions - from all else beyond our control, we can find a surer footing with which to greet the world and experience our own concept of happiness. - None of this is real when each of us tells stories about our lives in too tidy narratives that are seldom true and rarely helpful. - We should be wary of goal setting: long-term goals fixate us on a future that may not happen and we may not wish for when we get there. - Our partner isn't right for us because no-one is. None of us is born for someone else. But perhaps those areas of frequent conflict are useful indicators of where we might ourselves be insufferable. A Little Happier's 17 inspiring and reassuring lessons will help you define and find your own happiness. Its lessons challenge us to think differently about the meaning of happiness and how we can over overcome anxiety in a difficult world. ***** 'A no nonsense guide to seeing and appreciating the world we live in.' ***** 'A brilliant, insightful and clear book. A beautiful accompaniment to Happy.' ***** 'This book will have a big impact on people who suffer with anxiety and depression. A must read.'

A professional magician and illusionist—the head magic consultant for the hit film Now You See Me—reveals how to bridge the gap between perception and reality to increase your powers of persuasion and influence. David Kwong has astounded corporate CEOs, TED talk audiences, and thousands of other hyper-rational people, making them see, believe, and even remember what he wants them to. Illusion is an ancient art that centers on control: commanding a room, building anticipation, and appearing to work wonders. Illusion works because the human brain is wired to fill the gap between seeing and believing. Successful leaders—like Steve Jobs, Warren Buffett, and Ted Turner—are masters of control and command who understand how to sway opinions and achieve goals. In his years of research and practice, David has discovered seven fundamental principles of illusion. With these rules anyone can learn to: Mind the Gap—recognize and employ the perceptual space between your audience ' s ability to see and their impulse to believe. Load Up—prepare to amaze your audience. Write the Script—discover the importance of shaping the narrative that surrounds your illusion. Control the Frame—explore the real life value of a magician ' s best friend: misdirection. Design Free Choice—command your audience by giving them agency. Employ the Familiar—take secret advantage of habits, patterns, and audience expectations. Conjure an Out—develop backup plans that will keep you one, two, three, or more steps ahead of the competition. With Spellbound you ' ll discover a different way to sell your idea, product, or skills, and make your best shot better than everyone else ' s.
