As seen in Time, USA TODAY, The Atlantic, The Wall Street Journal, and on CBS This Morning, BBC, PBS, CNN, and NPR, iGen is crucial reading to understand how the children, teens, and young adults born in the mid-1990s and later are vastly different from their Millennial predecessors, and from any other generation. With generational divides wider than ever, parents, educators, and employers have an urgent need to understand today ' s rising generation of teens and young adults. Born in the mid-1990s up to the mid-2000s, iGen is the first generation to spend their entire adolescence in the age of the smartphone. With social media and texting replacing other activities, iGen spends less time with their friends in person—perhaps contributing to their unprecedented levels of anxiety, depression, and loneliness. But technology is not the only thing that makes iGen distinct from every generation before them; they are also different in how they spend their time, how they behave, and in their attitudes toward religion, sexuality, and politics. They socialize in completely new ways, reject once sacred social taboos, and want different things from their lives and careers. More than previous generations, they are obsessed with safety, focused on tolerance, and have no patience for inequality. With the first members of iGen just graduating from college, we all need to understand them: friends and family need to look out for them; businesses must figure out how to recruit them and sell to them; colleges and universities must know how to educate and guide them. And members of iGen also need to understand themselves as they communicate with their elders and explain their views to

their older peers. Because where iGen goes, so goes our nation—and the world.

The ToDon'tList – method is the opposite of what all the time management gurus want you to believe. Do less instead of more. With this project planner it has never been easy to focus on your goals. The author used the ToDon'tList concept a lot in his studio while brainstorming, developing new ideas or working on projects. "That's a good idea, but let's put it on the ToDon'tList for now" In that way he kept his focus on his goals. The ToDon'tList concept became a method, and the method became the inspiration for writing Don't Read this book. Like the Don't/Do This – Game, the ToDon't List is an addition to the ToDon't – Family, which works independently as well. The simple lists help you make choices and focus on many different levels: Life, Work, Projects, Daily Goals and more.
