Duo Access Gateway acts as an identity provider (IdP), authenticating your users using existing on-premises Active Directory (AD) credentials and prompting for two-factor authentication before permitting access to Office 365. Duo Access Gateway is included in the Duo Beyond, Duo Access, and Duo MFA plans, which also include the ability to define policies that enforce unique controls for each individual SSO application. For example, you can require that Salesforce users complete two-factor ...

Duo Protection for Office 365 | Duo Security

In addition, Duo gives customers visibility into the security posture of all bring your own devices (BYOD) and unmanaged devices accessing Office 365 to help them stay compliant. If admins detect an out-of-date or vulnerable device getting access to Office 365, they can set a Duo policy to prevent this device from getting access.

5 Best Practices to Secure Microsoft Office 365 ... - Duo Security

Duo Security, now part of Cisco, is the leading provider of zero-trust security and multi-factor authentication. Duo's zero-trust security platform, Duo Beyond, enables organizations to provide trusted access to all of their critical applications - for any user, from anywhere, and with any device. Duo helps you: Verify the identity of all users with Duo's strong two-factor authentication.

Duo Security - appsource.microsoft.com

The link you provided is to protect Office 365 with the Duo Access Gateway by setting up federation between the Duo Access Gateway and Office 365 using SAML. This approach is great if you want to protect many SAML 2.0 applications but if you're looking to only protect Office 365 logins you might want to take a look at our integration with Azure Conditional Access .

Duo Integration with Office 365 - Duo Security Community

If you haven't migrated your email application to the cloud with Office 365, you can also use Duo to protect remote access to your on-premises Exchange environment. After deployment, you can set user- and device-based access policies for access to your Outlook Web App. All it takes is running the Duo Security Installer package on any Client Access Service (CAS) servers that handle client connections to Microsoft Exchange from Outlook Web App. The installation takes less than five minutes ...

Protecting Microsoft Email With Duo | Duo Security

Duo Security (<https://www.duo.com>) offers a variety of methods for adding two-factor authentication and flexible security policies to Microsoft Office 365 SSO logins, complete with inline...

### How to Install Duo Two-factor Authentication for Office 365 with Duo Access Gateway

We are currently looking into implementing Duo into our Office 365 environment. We need to have basic authentication enabled so that users are able to use the Android email client on their phones and for email relay to continue to work effectively. We are currently using Azure AD Connect to sync our local AD with our cloud identities.

### Implementing Duo MFA with Office 365 - Spiceworks

The Duo AD FS module supports relying parties that use Microsoft's WS-Federation protocol, like Office 365, as well as SAML 2.0 federated logons for cloud apps like Google G Suite and salesforce.com. The AD FS application is part of Duo Beyond, Duo Access, and Duo MFA plans.

### Microsoft AD FS for Windows 2012 R2 and later | Duo Security

Secure Single Sign-On Once your users' identities are verified and their devices are trusted, they can access your cloud applications immediately. And Duo checks device health at every point of access. It's simple and easy.

### Duo Demos - Duo Security

Duo is a user-centric access security platform that provides two-factor authentication, endpoint security, remote access solutions and more to protect sensitive data at scale for all users, all devices and all applications.

### Two-Factor Authentication & Endpoint Security | Duo Security

Duo offers a variety of methods for adding two-factor authentication and flexible security policies to Microsoft Office 365 SSO logins, complete with inline self-service enrollment and Duo Prompt. This video explains how to protect Microsoft Office 365 SSO logins using Duo's on-premises SSO product, Duo Access Gateway.

### How to Install Duo for Office 365 with Duo ... - Duo Security

Configure your settings as desired, as described in Step 3 of the Create the Office 365 Application in Duo section of the documentation. Save and export the new JSON file for the Office 365 application. Import this into your DAG to replace the existing JSON file. Pre-August 2017 Steps

### How do I enable Basic Auth after federating Office 365 ...

South Texas College has integrated Duo Security MFA with Office 365 services (Email, OneDrive, SharePoint, Teams, etc.) to help provide extra security when accessing these resources from outside the college network.

### Office 365 + Duo Security MFA | Information Security

Yes, it is possible to protect Quarantine within Office 365's Security and Compliance Center with Duo's Azure Conditional Access (CA) application. You must add Office 365 (Preview) to the Conditional Access policy; only protecting individual apps, such as Exchange Online and Sharepoint Online, will not allow access to quarantined files.

### Can I protect logins to Quarantine in Office 365's ...

Integrating Duo with Office 365 requires enabling Microsoft's Modern Authentication (ADAL) on the tenant in order to access Office 365 online services with rich client apps. Unless Basic Auth is enabled during SSO configuration, native and third-party mail apps that do not support Modern Authentication will fail to connect to Office 365 mailboxes.

### Will mobile mail clients be affected if Office 365 is set ...

Duo has screen captures available in our Office 365 client access documentation. The experience and workflow is the same between Office 2013 and 2016 apps, however, Office 2013 requires a registry change in order to enable Modern Authentication. See Enable Modern Authentication for Office 2013 on Windows devices for more information.

### Guide to understanding Modern ... - Duo Security

Using two-factor authentication with Office 365 requires Modern Authentication to be enabled. There is a separate setting within the Office 365 administration settings for enabling Modern Authentication for Skype for Business. By default, this is turned off even if Modern Authentication for the rest of the Office 365 suite is enabled.
