They find it easy to read, interesting and engaging. . . . This textbook's major strengths are its cognitive perspective, its readability, and the fact that it puts into practice some of the information-processing strategies that it teaches as effective ways to process information. . . ."

--Elizabeth Pemberton, University of Delaware "[T]he text is written in a . . . conversational style that invites students to actively explore complex questions about teaching and learning. It is well-organized, supported with visual aids, and various learning tools, such as guidelines, reflection activities, and cases presenting opposing viewpoints. Most importantly, the text is informed and well supported by contemporary scholarship in the field of educational psychology." --Alina Reznitskaya, Montclair State University

This text, known for its state of the art presentation of the field of educational psychology, is exceptionally applied and replete with examples, lesson segments, case studies, and practical ideas

Through four successful editions, this briefer book uses an approach which promotes learning as an "activity" of the reader - it shows how "active learning" can motivate and excite readers to a deeper understanding of introductory psychology. With balanced and modern treatment of gender and culture, this book encourages readers to develop "critical thinking" skills. It is organized around the SQ4R (survey, question, read, recite, review) method of learning.

NOTE: Before purchasing, check with your instructor to ensure you select the correct ISBN. Several versions of Pearson's MyLab products exist for each title, and registrations are not transferable. The 12th Edition of Educational Psychology maintains the lucid writing style for which the author is renowned. It is as free of jargon and technical language as possible in order to be clear, relevant, and interesting to all readers. Theory and practice are not separated in the text, but are considered together. The book shows very clearly how information and ideas drawn from research in educational psychology can be applied to solve the everyday problems of teaching. Readers explore the connections between research and practice through a wealth of examples, lesson segments, case studies, guidelines, and practical tips from experienced teachers. The content reveals the immense value and usefulness of educational psychology, a field that offers unique and crucial knowledge to any who dare to teach and to all who love to learn. Now with SAGE Publications, Cheryl Cisero Durwin and Marla Reese-Weber's EdPsych Modules uses an innovative implementation of case studies and a modular format to address the challenge of effectively connecting theory and research to practice. Each module is a succinct, stand-alone topic that represents every subject found in traditional chapter texts and can be used in any order for maximum flexibility in organizing your course. Each of the book's eight units of modules begins with a set of four case studies—early childhood, elementary, middle school, and secondary—and ends with “Assess” and “Reflect and Evaluate” questions and activities to encourage comprehension and application of the research and theories presented. The case approach and the extensive pedagogy that support it allows students to constantly see the applications of the theories and research that they are studying in the text.

This highly anticipated second edition of The Curriculum Studies Reader retains key features of the successful first edition while incorporating an updated introduction and new, timely essays. Grounded in historical essays, the volume provides context for the growing field of curriculum studies, reflects upon the trends that have dominated the field, and samples the best of current scholarship. This thoughtful combination of essays provides a survey of the field coupled with concrete examples of innovative curriculum, and an examination of contemporary topics like HIV/AIDS education and multicultural education.

Because the organization of the classroom and the school provide the framework for teaching and learning, this important volume reviews research that focuses on specific issues including: achievement effects of alternative school and classroom organizational practices, ability grouping, departmentalization, special and remedial programs, evaluation processes, and class size. The studies utilize realistic evaluations rather than laboratory or experimental data, and do not prescribe particular practices.
