Working in Excel, you will hear the words "formula" and "function" used frequently,

Get Free Excel Formulas And Functions Fd 4e For

Dummies interchangeably. They are closely related, but not exactly the same. Technically, a formula is any expression that begins with an equals sign (=). A function, on the other hand, is a formula with a special name and purpose.

FUNCTION IN EXCEL is a predefined formula that is used for specific values in a particular order. Function is used for quick tasks like finding the sum, count, average, maximum value, and minimum values for a range of cells. For example, cell A3 below contains the SUM function which calculates the sum of the range A1:A2.
