Future Shock is a 1970 book by the futurist Alvin Toffler, written together with his spouse Adelaide Farrell, in which the authors define the term "future shock" as a certain psychological state of individuals and entire societies. The book has never been out of print and has been translated into dozens of languages. He continued the theme in *The Third Wave* in 1980. While he describes the first and second waves as the agricultural and industrial revolutions, the "third wave," a phrase he coined, represents the current information ...

Future Shock is about the present. Future Shock is about what is happening today to people and groups who are overwhelmed by change. Change affects our products, communities, organizations--even our patterns of friendship and love. Future Shock vividly describes the emerging global civilization: tomorrow's family life, the rise of new businesses, subcultures, life-styles, and human relationships--all of them temporary. Future Shock illuminates the world of tomorrow by exploding countless cliches about today. Future Shock will intrigue, provoke, frighten, encourage, and, above all, change everyone who reads it.

Starting with the publication of their seminal bestseller, Future Shock, Alvin and Heidi Toffler have given millions of readers new ways to think about personal life in today's high-speed world with its constantly changing, seemingly random impacts on our businesses, governments, families and daily lives. Now, writing with the same rare grasp and clarity that made their earlier books classics, the Tofflers turn their attention to the revolution in wealth now sweeping the planet. And once again, they provide a penetrating, coherent way to make sense of the seemingly senseless. Revolutionary Wealth is about how tomorrow's wealth will be created, and who will get it and how. But twenty-first-century wealth, according to

the Tofflers, is not just about money, and cannot be understood in terms of industrial-age economics. Thus they write here about everything from education and child rearing to Hollywood and China, from everyday truth and misconceptions to what they call our “third job”—the unnoticed work we do without pay for some of the biggest corporations in our country. They show the hidden connections between extreme sports, chocolate chip cookies, Linux software and the “surplus complexity” in our lives as society wobbles back and forth between depressing decadence and a hopeful post-decadence. In their earlier work, the Tofflers coined the word “prosumer” for people who consume what they themselves produce. In *Revolutionary Wealth* they expand the concept to reveal how many of our activities—whether parenting or volunteering, blogging, painting our house, improving our diet, organizing a neighborhood council or even “mashing” music—pump “free lunch” from the “hidden” non-money economy into the money economy that economists track. Prosuming, they forecast, is about to explode and compel radical changes in the way we measure, make and manipulate wealth. Blazing with fresh ideas, *Revolutionary Wealth* provides readers with powerful new tools for thinking about—and preparing for—their future.

Explores the nature and implications of a third wave of change that is now creating a new civilization with its own lifestyles, jobs, sexual attitudes, concepts of family and love, economic structures, and political philosophies

The future is big right now—for perhaps the first time, our society is more focused on what is going to happen in the future than what is happening right now. In *Trees on Mars: Our Obsession with the Future*, cultural critic and indie entrepreneur Hal Niedzviecki asks how and when we started believing we could and should “create the future.” What is it like to live in a society utterly focused on what is going to happen next? Through visits to colleges, corporations, tech conferences, factories and more, Niedzviecki traces the story of how owning the future has become irresistible to us. In deep conversation with both the beneficiaries and victims of our relentless obsession with the future, Niedzviecki asks crucial questions: *Where are we actually heading? How will we get there? And whom may we be leaving behind?*
