A student-friendly and engaging resource for the 2016 Edexcel GCSE Geography B specification, this brand new course is written to match the demands of the specification. As well as providing thorough and rigorous coverage of the spec, this book is designed to engage students in their learning and to motivate them to progress.

Test questions are provided for each chapter of this textbook, together with detailed mark schemes to make assessment easy. Two versions of each question are provided. One allows pupils to write their answers in the spaces provided and the other requires pupils to have separate writing paper. Questions can be grouped according to needs. Master grids are provided to cut and paste tests together in a consistent format to use the resource in any order. Chapter tests can be grouped to form a module test after chapters. End-of-chapter examinations can also be produced in this way. A free non-calculator supplement organized by unit/chapter is also included in this resource.

researchED is an educator-led organisation with the goal of bridging the gap between research and practice. This accessible and punchy series, overseen by founder Tom Bennett, tackles the most important topics in education, with a range of experienced contributors exploring the latest evidence and research and how it can apply in a variety of classroom settings. Claiming that the leadership industry has failed to have the impact on schools that is required, this book takes a fresh view that domain-specific knowledge and expertise is vital to running schools well and argues that we tend to underestimate the knowledge required to do this complex job efficiently. In the researchED guide to leadership, Stuart Lock brings together chapters by experts including Dylan Wiliam, Jen Barker, Danielle Dennis, Jon Hutchinson and The Reading Ape to unpick the challenges of school leadership, combining a thorough trawl of the research and mixing in practical advice to exemplify a very different approach to leading schools - one that is rooted in developing the required knowledge to address the challenges that are common to our schools.

A hugely enjoyable, brilliantly researched explanation of the basic principles of maths.

Shrubs of broom grow black and twistedAs if by Devil's fingers And the wind that never ceases, Like a chorus from the dead. Those who lived here it's for certain, would grow dark and tortured too' In Jamaica Inn, at the heart of the bleak Bodmin Moor, young Mary Yellen soon discovers mysterious goings-on in the dead of night. But worse is yet to come as Mary finds herself helplessly ensnared in the deadly activities taking place around her. Evocative, atmospheric and chilling, this new adaptation of Jamaica Inn has all the hallmarks of a great adventure classic — murder, mystery and malevolence. Jamaica Inn was produced at the Salisbury Playhouse in May 2004and was followed by a UK tour.

Retrieval practice is a strategy in which bringing information to mind enhances and boosts learning. In this punchy and accessible book, Kate Jones gives educators strategies and tips for using this powerful technique in their classrooms.

Written specifically for the Foundation and Intermediate tier GCSE for the AQA Modular GCSE Specification B. This clearly presented book will help all students looking to achieve a grade C in GCSE maths. An ideal, stand-alone resource for students doing the GCSE course in one year including students resitting modules.

This book contains 10 exam practice papers and it is aimed at May/June 2021 IGCSE Mathematics examination for higher level. These papers are written according to the new 9 to 1 syllabus mainly for Edexcel, however they can still be used as practice for other exam boards as well. Each section contains 2 exam papers labelled as paper 1 & paper 2 similar to the actual exam.

Apollo 11 astronaut Buzz Aldrin's courageous, candid memoir of his return to Earth after the historic moon landing and his personal struggle with fame and depression. "We landed with all the grace of a freight elevator," Buzz Aldrin relates in the opening passages of Return to Earth, remembering Command Module Columbia's abrupt descent into the gravity of the blue planet. With that splash, Aldrin takes readers on a journey through the human side of the space program, as one of the first two men to land on the moon learns to cope with the pressures of his new public persona. In honest and compelling prose, Aldrin reveals a side of instant fame for which West Point and NASA could never have prepared him. One day a fighter pilot and engineer, the next a cultural hero burdened with the adoration of thousands, Aldrin gives a poignant account of the affair that threatened his marriage, as well as his descent into alcoholism and depression that resulted from trying to be too many things to too many people. He didn't realize that when he landed on his home planet his odyssey had just begun. As Aldrin puts it, "I traveled to the moon, but the most significant voyage of my life began when I returned from where no man had been before." Return to Earth is a powerful and moving memoir that exposes the stresses suffered by those in the Apollo program and the price Buzz Aldrin paid when he became an American icon.
