Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. BlackwellAssistant Secretary for Maritime Affairs

The acclaimed author of Sweetness in the Belly journeys to Vietnam in this rich and tantalizing new novel. Raised in the United States but Vietnamese by birth, Maggie has come to Hanoi seeking clues to the fate of her father, a dissident artist who disappeared during the war. Her search brings her to Old Man Hu'ng's pho stall. The old man once had a shop frequented by revolutionary artists, but now Tu', a hustling young entrepreneur, is his most faithful customer. Maggie, Hu'ng, and Tu' come together during a highly charged season that will mark them forever. Exploring the indelible legacies of war and art, as well as love's power to renew, The Beauty of Humanity Movement is a stellar achievement by a globally renowned literary light.
