Law and Agreements among Nations to Facilitate Environmental Protection.

Beginning by exploring the history, nature, and sources of international environmental law, Professor Koivurova moves on to consider the key principles as well as examining the implementation and effectiveness of international environmental law in practice. It considers how international environmental law has developed away from other branches of international law which are heavily based on state sovereignty, in order to more effectively facilitate environmental protection and concludes by posing questions about the future of the field. Taking a concise, accessible approach throughout and employing case studies drawn from a global range of examples, this book is the ideal first

of compliance with international environmental law, the book goes on to explore in detail: compliance in the different legal regimes instituted by Multilateral Environmental Agreements (MEAs), the addition of new subjects of international law, the legal relations between developed and developing countries, and the emergence of new compliance mechanisms in global environmental law. The analysis takes two key developments into consideration: the evolution in forms of compliance and non-state involvement in compliance with international environmental law. In the final section, three case studies are provided to demonstrate how these changes have occurred in selected areas: climate change, biodiversity and water resources. Throughout the book, topics are

new textbook written for students, practitioners, and anyone interested in the subject. The overall aim of the book is to provide a fresh understanding of international environmental law as a whole, seen in the light of climate change, biodiversity loss, and the other serious environmental challenges facing the world. The book has also been kept deliberately manageable in size by careful selection of topics and by adopting a cross-cutting synthesis of regulatory interaction in the field. This enables the reader to place international environmental law in the broader context of public international law in general, revealing at the same time that international environmental law is experimental ground for developing new legal approaches towards global

governance. To this end, the authors have combined theory and practice. Apart from discussing concepts, rule-making and compliance, the book looks at options for improved coordination, harmonisation and even integration of existing multilateral environmental agreements, analysing how conflicts between various environmental regimes can be avoided or, at least, adequately managed. The authors argue that an appropriate management of international environmental relations must address the North-South divide, which continues to be a major obstacle to global environmental cooperation. Furthermore, the authors emphasise the growing human rights dimension of international environmental law. This book is an ideal 'door opener' for the further study of international
