Introduction to information systems
IS1060 | University of ...

An information system is the information and communication technology (ICT) that an organization uses, and also the way in which people interact with this technology in support of business processes. Some authors make a clear distinction between information systems, computer systems, and business processes.

Information system - Wikipedia

Information systems (IS) are computing systems that support business operations, management, and decision making in organizations. IS are an integral part of virtually every work environment and play a critical role in running organizations. They are the heart of the internet-based economy.
