We rely on willpower to create change in our lives...but what if we're thinking about it all wrong? In Willpower Doesn't Work, Benjamin Hardy explains that willpower is nothing more than a dangerous *fad*—one that is bound to lead to failure. Instead of "white-knuckling" your way to change, you need to instead alter your surroundings to support your goals. This book shows you how. The world around us is fast-paced, confusing, and full of distractions. It's easy to lose focus on what you want to achieve, and your willpower won't last long if your environment is in conflict with your goals—eventually, the environment will win out. Willpower Doesn't Work is the needed guide for today's over-stimulating and addicting environment. Willpower Doesn't Work will specifically teach you: How to make the biggest decisions of your life--and why those decisions must be made in specific settings How to create a daily "sacred" environment to live your life with intention, and not get sucked into the cultural addictions How to invest big in yourself to upgrade your environment and mindset How to put "forcing functions" in your life--so your default behaviors are precisely what you want them to be How to quickly put yourself in proximity to the most successful people in the world--and how to adapt their knowledge and skills to yourself even quicker How to create an environment where endless creativity and boundless productivity is the norm Benjamin Hardy will show you that nurture is far more powerful than your nature, and teach you how to create and control your environment so your environment will not create and control you.

Jerry Fodor argues against the widely held view that mental processes are largely computations, that the architecture of cognition is massively modular, and that the explanation of our innate mental structure is basically Darwinian.

New York Times!Bestseller: An 'engrossing! history of economics, from an author with 'excellent storytelling skills' and an Eisner Award-winning artist (Boing Boing). Stimulus plans: good or bad? Free markets: How free are they? Jobs: Can we afford them? Capitalism, socialism, and communism: What's the difference? Corporations: Are they people? For those who want to better understand what Wall Street and Washington know (or say they know), this graphic history, with clear, witty writing and quirky, entertaining art, transforms 'the dismal science' of economics into a fun, fact-filled story about human nature and our attempts to make the most of what we've got. [!](#)Quite accessible. . . Goodwin brilliantly contextualizes economic theories with historical narrative, while Burr's simple but elegant illustration employs classical techniques like caricaturing politicians and symbolizing big businesses (as a gleeful factory) to help the reader visualize difficult concepts. [!](#) Publishers Weekly (starred review) [!](#)You could read ten books on the subject and not glean as much education. [!](#) David Bach, #1 New York Times!bestselling author of The Automatic Millionaire [!](#) Just cannot stress enough how amazing this book is. [!](#) Wired

Read award-winning journalist Frank Bruni's New York Times bestseller: an inspiring manifesto about everything wrong with today's frenzied college admissions process and how to make the most of your college years. Over the last few decades, Americans have turned college admissions into a terrifying and occasionally devastating process, preceded by test prep, tutors, all sorts of stratagems, all kinds of rankings, and a conviction among too many young people that their futures will be determined and their worth established by which schools say yes and which say no. In Where You Go is Not Who You'll Be, Frank Bruni explains why this mindset is wrong, giving students and their parents a new perspective on this brutal, deeply flawed competition and a path out of the anxiety that it provokes. Bruni, a bestselling author and a columnist for the New York Times, shows that the Ivy League has no monopoly on corner offices, governors' mansions, or the most prestigious academic and scientific grants. Through statistics, surveys, and the stories of hugely successful people, he demonstrates that many kinds of colleges serve as ideal springboards. And he illuminates how to make the most of them. What matters in the end are students' efforts in and out of the classroom, not the name on their diploma. Where you go isn't who you'll be. Americans need to hear that--and this indispensable manifesto says it with eloquence and respect for the real promise of higher education.

Written by corporate responsibility consultant and certified coach Shannon Houde, this book is part career guide and part job search help - and all purpose-driven. From understanding what the 'purpose economy' is and how you fit into it, to what jobs to go for and how to land them, Good Work is the helping hand you need to make a career out of changing the world.

It Doesn't Hurt to Work is a transformational memoir about breaking free from the physical pain and mental misery of achieving the "perfect" body, and a guide to helping you find strength and whole-body health through the practice of functional fitness. As a former cardio-junkie and champion calorie-counter, author Erin Paruszewski grew up believing that "more is more" when it came to exercise and "less is more" when it came to food. On the outside, she was in great shape. But on the inside, her body was falling apart thanks to the wear and tear of overexercising and fueling herself with a chemically processed, low-fat, high-sugar diet. After hitting rock-bottom, this reality set her on a new trajectory in both body and mindset. Erin's lived experience and functional lifestyle pivot are the inspiration behind this how-to message as she blends narrative stories and research-based explanations of how our bodies and minds work best.
