Going beyond the author's previous text, this up-to-date book presents the latest LRFD specifications, which are mandatory in the design and use of steel structures. Included is a concise introduction to fillet-welded and beaming-type bolted connections for tension members. Accurate page numbers are provided for each cited LRFD specification, design and recommended design procedure. This timely title offers new material not found in the previous work, including bracing requirements, connections, plate girders, composite members and plastic analysis and design. Appendices contain the results of an elastic factored load analysis of an industrial type building for the applicable LRFD loading combinations and a concise review of material pertaining to principal axes for column and beam action.

This book presents the latest trends and challenges in the development of general engineering and mechanical engineering in the agriculture and horticulture sectors.

If necessity is indeed the mother of invention, then the individuals profiled in this volume should be considered the most laudable of all midwives. They each saw a need and met it. Readers will learn more about the lives and methodologies of well-known inventors such as Benjamin Franklin and Thomas Edison, and become familiar with several more whose creations have sometimes outstripped their personal fame.

Today, herbicide-resistant weeds dominate research and development efforts in the discipline of weed science. The incidence, management challenges, and cost of multiple herbicide-resistant weed populations are continually increasing worldwide. Crop varieties with multiple herbicide-resistance traits are being rapidly adopted by growers and land managers to keep ahead of the weed resistance tsunami. This Special Issue of *Plants* comprises papers that describe the current status and future outlook of herbicide resistance research and development in weedy and domestic plants, with topics covering the full spectrum from resistance mechanisms to resistance management. The unifying framework for this Special issue is the challenge posed to all of the contributing authors: What are the (potential) implications for herbicide resistance management?

Metals and Related Substances in Drinking Water comprises the proceedings of COST Action 637 - METEAU, held in Kristianstad, Sweden, October 13-15, 2010. This book collates the understanding of the various factors which control metals and related substances in drinking water with an aim to minimize environmental impacts. *Metals and Related Substances in Drinking Water*: * Provides an overview of knowledge on metals and related substances in drinking water. * Promotes good practice in controlling metals and related substances in drinking water. * Helps to determine the environmental and socio-economic impacts of control measures through public participation * Introduces the importance of mineral balance in drinking water especially when choosing treatment methods * Shares practitioner experience. The proceedings of this international conference contain many state-of-

the-art presentations by leading researchers from across the world. They are of interest to water sector practitioners, regulators, researchers and engineers.

This book details the development of methods and models to study the HIV-1 viral reservoir with the ultimate goal of achieving a functional cure of HIV infection. Chapters are divided into six parts covering cell lines, in vitro and ex vivo primary cell models of persistent infection, in vitro and ex vivo tissue-derived models, infected animal models human immune cells, methods of detection and analysis of the reservoir, and current approaches to achieve either a functional cure or cART-free long-term remission. Written in the format of the highly successful Methods in Molecular Biology series, each chapter includes an introduction to the topic, lists necessary materials and reagents, includes tips on troubleshooting and known pitfalls, and step-by-step, readily reproducible protocols. Authoritative and cutting-edge, HIV Reservoirs: Methods and Protocols provides a comprehensive, updated collection of state-of-art methodologies and models to tackle the HIV-1 viral reservoir.
