Max est petit. Très petit par rapport à ses camarades de quatrième. Trop petit pour passer inaperçu aux yeux de Pédro et de sa bande de maxi durs qui le prennent rapidement en grippe et ne cessent de l'humilier. Mais si petit soit-il, Max n'est pas à court d'idées.

À force de faire bêtise sur bêtise dans son terrible costume de loup, Max s'est retrouvé puni et enfermé dans sa chambre. Mais pas seulement. Voilà qu'il se retrouve aussi roi d'une armée de bêtes immondes, les Maximonstres. Max le maudit les a domptés. Ils sont griffus, dentus, poilus, vivent sur une île et ne savent rien faire que des sarabandes, des fêtes horribles où il n'y a rien à manger. Max a la nostalgie de son chez-lui, des bonnes odeurs de cuisine et de l'amour de sa mère. Que faut-il faire pour rentrer ? Peut-être commencer par le désirer... A partir de 5 ans.

This interdisciplinary book primarily introduces a novel algorithm that finally enables computers to efficiently diagnose diseases

Following Amartya Sen's insistence to expand the framework of rational choice theory by taking into account 'non-utility information,' economists, political scientists and philosophers have recently concentrated their efforts in analysing the issues related to rights, freedom, diversity intentions and equality. Thomas Boylan and Ruvin Gekker have gathered essays that reflect this trend. The particular themes addressed in this volume include: the measurement of diversity and freedom, formal analysis of individual rights and intentions, judgment aggregation under constraints and strategic manipulation in fuzzy environments. Some papers in the volume also deal with philosophical aspects of normative social choice.

Distributed Coordination of Multi-agent Networks introduces problems, models, and issues such as collective periodic motion coordination, collective tracking with a dynamic leader, and containment control with multiple leaders, and explores ideas for their solution. Solving these problems extends the existing application domains of multi-agent networks; for example, collective periodic motion coordination is appropriate for applications involving repetitive movements, collective tracking guarantees tracking of a dynamic leader by multiple followers in the presence of reduced interaction and partial measurements, and containment control enables maneuvering of multiple followers by multiple leaders.

This volume presents interviews that have been conducted from the 1980s to the present with important scholars of social choice and welfare theory. Starting with a brief history of social choice and welfare theory written by the book editors, it features 15 conversations with four Nobel Laureates and other key scholars in the discipline. The volume is divided into two parts. The first part presents four conversations with the founding fathers of modern social choice and welfare theory: Kenneth Arrow, John Harsanyi, Paul Samuelson, and Amartya Sen. The second part includes conversations with scholars who made important contributions to the discipline from the early 1970s onwards. This book will appeal to anyone interested in the history of economics, and the history of social choice and welfare theory in particular.

The 2007-09 financial crisis and economic downturn inflicted considerable hardship on the U.S. population. This book argues that the financial crisis and ensuing recession reflected not just a malfunctioning of the financial system - but also inequalities and insecurities in access to livelihoods that favor well-off groups and leave ordinary people shouldering undue burdens of downside risk. This book, a collection of original papers by leading social economists and scholars in related fields, examines social, distributional, and ethical dimensions of the downturn. It should be of broad interest to the social-science and economic-policy communities.

In the 90s, new languages and architectures were developed, new systems and networks were produced and new applications invented. The basic topics discussed are; High Speed Data Communications Protocols, Services and Networks for high speed data and for combined voice and data applications - i.e. ATM, SMDS, Frame Relay - Network Management, OSS Platforms, OSI and other information Technology Services, Network Control and Routing, Emergency Control and Telecommunication Politics. This publication offers the material basis for propagating the most advanced ideas, products, decisions and results of the 90s, and thereby it celebrates the advancements of Computer Communication on the route towards a new era.

There is a man, who after an unfortunate event underwent a phase when he was waiting only either to be dead or to be rescued. He had to kill the time but with something sweet; he closed his eyes and remembered those moments of his life he lived. One by one, pictures flashed in front of the mind's eyes and all he could do was to witness, silently. He was rescued and his life took a U-turn. Back in his world, questioned his love ones about incidents in their lives those affected them the most. He meant the incidents they wouldn't stop thinking about come what may. He gave his ears to all of it. In the end, he got a handful of them to hold on to and called it: Life – an ATOM in itself; and thus, the book All Those Osum moments! The world's private stories are always the hidden beautiful treasures in one's life but through the stories he realized those were still as much public as there is something common we all can share in the stories. Not all but often, we remember moments we felt we had experienced the extremes of Love, Hate, Hugs and Kisses. Love is also an emotion that makes you the most vulnerable and melts you exactly the same as does revenge in one's life.
