introductory text which discusses the development of pragmatics - its aims and methodology - and also introduces themes that are not generally covered in other texts. Jenny Thomas focuses on the dynamic nature of speaker meaning, considering the central roles of both speaker and hearer, and takes into account the social and psychological factors involved in the generation and interpretation of utterances. The book includes a detailed examination of the development of Pragmatics as a discipline, drawing attention to problems encountered in earlier work, and brings the reader up to date with recent discussion in the field. The book is written principally for students with no previous knowledge of pragmatics, and the basic concepts are covered in considerable detail. Theoretical and more complicated information is highlighted with examples that have been drawn from the media, fiction and real-life interaction, and makes the study more accessible to newcomers. It is an ideal introductory textbook for students of linguistics and for all who are interested in analysing problems in communication.

This is an introduction to pragmatics, the study of how people make sense of each other linguistically. The author explains, and illustrates, basic concepts such as the co-operative principle, deixis, and speech acts, providing a clear, concise foundation for further study.

A group of pre-eminent figures offer a conspectus of the interaction of game theory, logic and epistemology in the formal models of knowledge, belief, deliberation and learning.

This broad overview for graduate students introduces multidisciplinary topics from robotics to sociology which are needed to understand the area.

This book offers a semantic and metasemantic inquiry into the representation of meaning in linguistic interaction. Kasia Jaszczolt's view represents the most radical stance on meaning to be found in the contextualist tradition and thereby the most radical take on the semantics/pragmatics boundary. It allows for the selection of the cognitively plausible object of enquiry without being constrained by such distinctions as what is said/what is implicated or what is linguistic and what is extralinguistic. She argues that this is the only promising stance on meaning. The analysis transcends the traditional distinctions drawn, and traditional questions posed, in post-Gricean pragmatics and philosophy of language. It heavily relies on the dynamic construction of meaning in discourse, using truth conditions as a tool but at the same time conforming to pragmatic compositionality ? whereby aspects of meaning that enter this composition have very different provenance. Meaning in Linguistic Interaction builds on the author's earlier work on Default Semantics and adds new arguments in favour of radical contextualism as well as novel applications, focusing on the role of salience, the flexibility of word meaning, the literal/nonliteral distinction, and the dynamic nature of a character, as well as offering an entirely new perspective on the indexical/nonindexical distinction. It contains a state-of-the-art discussion of the semantics/pragmatics boundary disputes, focusing on varieties of semantic minimalism and contextualism and on

the limitations of an indexicalism. Jaszczolt's work is illustrated with examples from a variety of languages and offers some formal representations of meaning in the metalanguage of Default Semantics.

Introduction to Pragmatics guides students through traditional and new approaches in the field, focusing particularly on phenomena at the elusive semantics/pragmatics boundary to explore the role of context in linguistic communication. Offers students an accessible introduction and an up-to-date survey of the field, encompassing both established and new approaches to pragmatics. Addresses the traditional range of topics - such as implicature, reference, presupposition, and speech acts - as well as newer areas of research, including neo-Gricean theories, Relevance Theory, information structure, inference, and dynamic approaches to meaning. Explores the relationship and boundaries between semantics and pragmatics. Ideal for students coming to pragmatics for the first time.
