Meet the Cars features over 200 of the characters from movies Cars and Cars 2. It lays out the background of each car with a nice picture but in my opinion it does not compare in value to the Encyclopedia. Its paper cover is actually a poster of the most popular cars for a child to put on the wall and refer to.

The Psychology of the Car explores automotive cultures through the lens of psychology with the goal of achieving a low-carbon transport future. Worldwide there are now more than one billion cars, and their number grows continuously. Yet there is growing evidence that humanity needs to reach 'peak cars' as increased air pollution, noise, accidents, and climate change support a decline in car usage. While many governments agree, the car remains attractive, and endeavors to change transport systems have faced fierce resistance. Based on insights from a wide range of transport behaviors, The Psychology of the Car shows the "why" of automotive cultures, providing new perspectives essential for understanding its attractiveness and for defining a more desirable transport future. The Psychology of the Car illustrates the growth of global car use over time and its effect on urban transport systems and the global environment. It looks at the adoption of the car into lifestyles, the "mobilities turn," and how the car impacts collective and personal identities. The book examines car drivers themselves; their personalities, preferences, and personality disorders relevant to driving. The book looks at the role of power, control, dominance, speed, and gender play, as well as the interrelationship between personal freedom and law enforcement. The book explores risk-taking behaviors as accidental death is a central element of car driving. The book addresses how interventions can be successful as well as which interventions are unlikely to work, and concludes with how a more sustainable transport future can be created based on emerging transport trends. Features deep analyses of individual and collective psychologies of car affection, moving beyond sociology-based interpretations of automobile culture. Illustrates concepts using popular culture examples that expose ideas about automobility. Shows how fewer, smaller and more environmentally friendly cars, as well as low-carbon transport modes, are more socially attractive.

A perfectly pitched bedtime story and counting book for sleepy train lovers, illustrated in dramatic 3D sculptures! A little boy climbs into bed with a book and starts counting the train cars in it, between the engine and caboose. "Ten sleepy cars going clickety-clack," reads the refrain. But as the boy counts cars and gets sleepier and sleepier, his room looks more and more like one of the train cars from his book--the sleeping car, of course! Rhythmically told by the author of the Froggy books, Sleep Train is also stunning to look at. 3D illustrator, Lauren Eldridge, has sculpted an entire train full of intricate details. Part bedtime story, part counting book, part children's fantasy, Sleep Train is a magical ride to dreamland.
