Start Your Own Business Repairing Cell Phones Get Trained For Your Future Today! Open the door to an illustrious career! Learn Step By Step How To Fix Your Own Mobile Phones! If you find yourself in need of some mobile repair, or want to learn more about it to perhaps start repairing Cell phones for a little extra money this eBook has the information you need How to disassemble & assemble different types of cell phones Identifying different parts of GSM and CDMA handsets Tools used for mobile phone repairing How to use different tools used for mobile repairing Work of different parts & ICs Jumpering Techniques Techniques used to repair (troubleshooting) different faults Course includes repairing basic as well as advanced cellular phones

Our mobile phone repair course covers:TheoryPracticalAdditional Practice At Prizm Institute, the syllabus for mobile phone repair course is divided into 5 modules. The program covers all the topics that are necessary to learn for repairing and servicing mobile phones. Module 1 (Basics and Basic Electronics) The first module will act as a bridging course for those students who do not have any prior knowledge about the field. For others, who already have prior knowledge about electrical and electronic engineering, this module will help them revise these concepts. Basics of mobile communication.Study of Digital Electronics.Assembling and disassembling of various models of mobile phones.Study of various tools and equipment used in mobile phone repairs.Study of parts inside a mobile phone.Using a multimeter.Use of DC Power Supply (Jhatka machine).Module 2 (Hardware Repair) The second module will focus on hardware and teach the students how to handle and replace various electronic parts. It will help them to learn all the hardware repair procedures in a more comprehensive manner. Introduction and study of Printed Circuit Board (Motherboard).Details of various components on the PCB.Testing of various parts and components.Study of different ICs (chips) used on the motherboard.How to recognize various ICs.Soldering & desoldering of components by using a soldering iron.Soldering & desoldering of components by using a rework station.Reheating and mounting of various BGA and SMD chips.Ultrasonic cleaning procedure.Module 3 (Software Repair) Software problems are some of the most common ones faced by smartphone users. Sometimes, a software problem can lead to hardware abnormalities as well. This module will teach you how to perform various software repairing techniques. Detailed study of various faults arising due to corrupt software.Introduction of various flasher boxes and software.Flashing of various brands of handsets.Removing virus from infected phones.Unlocking of handsets through codes and/or software.Use of various secret codes.Module 4 (Basic and Advanced Troubleshooting) After receiving a customer ' s complaint, it is important to understand where the problem of the phone lies - hardware or software; and then repair it accordingly. This is where the troubleshooting module will come in handy. This module will teach you how to troubleshoot the problems in a mobile phone almost like an experienced mobile phone repair technician. Fault finding, troubleshooting and repairing of various faults.Common repair procedure for hardware related faults.Common repair procedure for software related faults.Water damaged repair techniques.Circuit tracing, jumper techniques and solutions.Troubleshooting through schematic diagrams.Use of internet for troubleshooting faults.Advanced troubleshooting techniques.Module 5 (Additional Learning) To be a successful mobile phone repair technician, one needs to know more than just the technical aspects of fixing a phone. This module aims to teach some additional topics to help you become a better mobile phone repair engineer. Clearing of all previous doubtsGuidance to start and manage your own mobile repair center.Guidance to successfully work as a technician.Procuring tools, spare parts and accessories.Dealing with customers and distributors.Marketing your mobile phone repair business We also teach our students various tips, tricks and trade secrets which are unknown to many technicians. This will help you in your all-round development and make you a professional mobile phone repair technician.

"If I had this book 10 years ago, the FBI would never have found me!" -- Kevin Mitnick This book has something for everyone---from the beginner hobbyist with no electronics or coding experience to the self-proclaimed "gadget geek." Take an ordinary piece of equipment and turn it into a personal work of art. Build upon an existing idea to create something better. Have fun while voiding your warranty! Some of the hardware hacks in this book include: \* Don't toss your iPod away when the battery dies! Don't pay Apple the \$99 to replace it! Install a new iPod battery yourself without Apple's "help" \* An Apple a day! Modify a standard Apple USB Mouse into a glowing UFO Mouse or build a FireWire terabyte hard drive and custom case \* Have you played Atari today? Create an arcade-style Atari 5200 paddle controller for your favorite retro videogames or transform the Atari 2600 joystick into one that can be used by left-handed players \* Modern game systems, too! Hack your PlayStation 2 to boot code from the memory card or modify your PlayStation 2 for homebrew game development \* Videophiles unite! Design, build, and configure your own Windows- or Linux-based Home Theater PC \* Ride the airwaves! Modify a wireless PCMCIA NIC to include an external antenna connector or load Linux onto your Access Point \* Stick it to The Man! Remove the proprietary barcode encoding from your CueCat and turn it into a regular barcode reader \* Hack your Palm! Upgrade the available RAM on your Palm m505 from 8MB to 16MB - Includes hacks of today's most popular gaming systems like Xbox and PS/2. · Teaches readers to unlock the full entertainment potential of their desktop PC. · Frees iMac owners to enhance the features they love and get rid of the ones they hate.

This reference provides a complete discussion of the conversion from standard lead-tin to lead-free solder microelectronic assemblies for low-end and high-end applications. Written by more than 45 world-class researchers and practitioners, the book discusses general reliability issues concerning microelectronic assemblies, as well as factors specif

The internationalisation of information and communication has accelerated since the 1990s in Europe and worldwide. Taking a close look at the empirical analysis of competitive trade positions, trends in foreign direct investment and the internationalisation of research and development in ICT brings many new insights about the expansion in the EU ' s most dynamic sector. Moreover, the analysis discusses case studies on key players in ICT and suggests major policy

CAD84: 6th International Conference and Exhibition on Computers in Design Engineering is a collection of 64 conference papers that covers a wide range of topics on computer-aided design (CAD) and CAD/CAM, including CAD process plant designs, techniques, drafting systems, electronics, geometric design, kinematics, mechanical engineering, solid modelling, and structures. The book starts by describing the progress that has been made in hardware and software. The text continues by presenting papers about interactive system for the design and production of computer programs; an algorithmic language for the definition and manipulation of drawings; and a software tool to enable application dialog input to be developed for new or existing programs with or without problem-oriented language. Papers on the design of a drawing system that consists of a language kernel for tailoring the system to support various styles and practices and on an automated drawing and cost estimation program for platform frame construction named HOUSE24 are also presented. The book also discusses HILO-2, which is a single coherent system for design verification, fault simulation, and test vector generation. The text will benefit both students and professionals using CAD.

The management magazine for the electronics industry.
