NX 11 Learning Edition is now available and features the same breakthrough convergent modeling technology as the full version of NX. With NX 11 Learning Edition, you can have access to the latest design methods to help you leverage topology optimization results, scanned data, and design for additive manufacturing (3D printing). There are other strong improvements to more traditional modeling techniques as well, such as feature modeling.

Your school must give you grades on a report card at least twice per year. Many schools choose to share report cards and student progress reports more often. Talk to your school about how frequently you can expect to receive report cards. Your report card might look different by grade or school. You begin with brief introduction to NX 11 and the User Interface, ribbon, environments, commands, and various options. Within a short time, you will learn to create 2D sketches that form the basis for 3D models. You will learn to sketch on three different planes (Front, Top and Right planes). You will use various sketching tools such as line, rectangle, circle, and so on.
