On Okuma controls, the bubble memory capacity is usually referred to in bits and ram memory capacity is referred to in bytes. Page 102 The following is an explanation of the different board configurations which can be found on Okuma machines with the OSP 5000 series control. Not all the boards are mentioned here, just the standard set of boards that are found with the particular main board.

I had the chance to run a Okuma Slant grinder for a short bit back in 2000-2001.. Loved it.. then again I used to run several on their mills with OSP5000, and OSP5020 controls with I.G.F., and IMap Leave a Comment

L'objectiu d'aquest text és introduir el lector en els conceptes i les

tecnologies que envolten el control numèric (CN) des d'un punt de vista d'aplicació i d'utilització. Es fa una introducció al CN, tant a nivell històric com a nivell d'aplicació, comparant la màquina convencional amb la màquina amb CN. S'exposen les característiques i els elements bàsics de les màquines amb CN, a fi d'entendre el seu funcionament i conèixer les seves possibilitats, i s'introdueixen els conceptes previs que cal tenir clar abans de programar amb CN.
