"I don't like killing, but I'm good at it. Murder isn't so bad from a distance, just shapes popping up in my scope. Close-up work though — a garrotte around a target's neck or a knife in their heart — it's not for me. Too much empathy, that's my problem. Usually. But not today. Today is different . . . " The year is 1955 and something is very wrong with the world. It is fourteen years since Churchill died and the Second World War ended. In occupied Europe, Britain fights a cold war against a nuclear-armed Nazi Germany. In Berlin the Gestapo is on the trail of a beautiful young resistance fighter, and the head of the SS is plotting to dispose of an ailing Adolf Hitler and restart the war against Britain and her empire. Meanwhile, in a secret bunker hidden deep beneath the German countryside, scientists are experimenting with a force far beyond their understanding. Into this arena steps a nameless British assassin, on the run from a sinister cabal within his own government, and planning a private war against the Nazis. And now the fate of the world rests on a single kill in the morning . . .

With MIT's App Inventor 2, anyone can build complete, working Android apps without writing code! This complete tutorial will help you do just that, even if you have absolutely no programming experience. Unlike books focused on the obsolete Google version, Learning MIT App Inventor is written from the ground up for MIT's dramatically updated Version 2. The authors guide you step-by-step through every task and feature, showing you how to create apps by dragging, dropping, and connecting puzzle pieces — not writing code. As you learn, you'll also master expert design and development techniques you can build on if you ever do want to write code. Through hands-on projects, you'll master features ranging from GPS to animation, build high-quality user interfaces, make everything work, and test it all with App Inventor's emulator. (You won't even need an Android device!) All examples for this book are available at theapplanet.com/appinventor. Coverage includes: Understanding mobile devices and how mobile apps run on them. Planning your app's behavior and appearance with the Designer. Using the Blocks Editor to tell your app what to do and how to do it. Creating variables and learning how to use them effectively. Using procedures to group and reuse pieces of code in larger, more complicated apps. Storing data in lists and databases. Using App Inventor's gaming, animation, and media features. Creating more sophisticated apps by using multiple screens. Integrating sensors to make your
