Abstract. The character of urban space is being recreated by changes, which are taking place very fast. Especially buildings that are a part of the complementary development have an important influence on its composition. With the penetration into the historical and compact urban fabric, the complementary buildings are transforming the face of well-known places that often have a rich history which was

ABSTRACT: How architects measure light is changing. Human perception of light is ostensibly the reason why spaces are illuminated, yet primary lighting guidelines used by architects measure how much light is falling on a surface, not the distribution of light to the human eye (Cuttle 2011). Recent lighting research related to human visual

PERCEPTION in Architecture: HERE and NOW - Cambridge ...

The visual perception of this town is reflected in its architectural elements. Silva (2006) argued that given the limited visual perception of historic towns, particularly on their physical elements, special preservation programs must be launched to improve the image of these areas. Therefore, an empirical study on the historic town
