This book is a printed edition of the Special Issue "PrP
prions: state of the art" that was published in
Pathogens

Global Nomads provides a unique introduction to the
globalization of countercultures, a topic largely
unknown in and outside academia. Anthony D'Andrea
examines the social life of mobile expatriates who live
within a global circuit of countercultural practice in
paradoxical paradises. Based on nomadic fieldwork
across Spain and India, the study analyzes how and
why these post-metropolitan subjects reject the
homeland in order to shape an alternative lifestyle.

They become artists, therapists, exotic traders and bohemian workers seeking to integrate labor, mobility and spirituality within a cosmopolitan culture of expressive individualism. These countercultural formations, however, unfold under neo-liberal regimes that appropriate utopian spaces, practices and imaginaries as commodities for tourism, entertainment and media consumption. In order to understand the paradoxical globalization of countercultures, Global Nomads develops a dialogue between global and critical studies by introducing the concept of 'neo-nomadism' which seeks to overcome some of the shortcomings in studies of globalization. This book is an essential aide for undergraduate, postgraduate and research students of Sociology, Anthropology of Globalization, Cultural Studies and Tourism Studies.

This is the story of Cot Daley, a young girl kidnapped from her home in Galway, and shipped out to Barbados, where more than fifty thousand Irish sold to as indentured servants to the plantation owners of the Caribbean work the land alongside African slaves. Most of them would never see their families again.

Unprecedented initiative in the world, the book compiles the available knowledge on the subject and presents the state-of-the-art in paleoparasitology – term coined about 30 years ago by Brazilian Fiocruz researcher Luiz Fernando Ferreira, pioneer in this science which is concerned with the study of parasites in the past. Multidisciplinary by essence, paleoparasitology gathers contributions from social scientists, biologists, historians, archaeologists,

pharmacists, doctors and many other professionals, either in biomedical or humanities fields. With varied applications such as in evolutionary or migration studies, their results often depend on the association between laboratory findings and cultural remains. The book is divided into four parts - Parasites, Hosts, and Human Environment; Parasites Remains Preserved in Various Materials and Techniques in Microscopy and Molecular Diagnostics; Parasite Findings in Archeological Remains: a paleographic view; and Special Studies and Perspectives. Signed by authors from various countries such as Argentina, USA, Germany and France, the book has chapters devoted to the discoveries of paleoparasitology on all continents.

JosT Bastos is an associate professor of anthropology at the New University of Lisbon. --
