But there's a big gap between the techniques used by individual investors in the residential buy-to-let market and the more disciplined, numbers-led approach used by professional real estate investors. Moreover, there is no single source of knowledge or wisdom that brings all these calculation techniques and metrics together in one place. This book aims to bridge this gap. It will teach you the techniques and formalised metrics used by professional investors to assess property deals and manage their portfolios. This book is about investing in sub \$30k properties (under \$30,000) and becoming a wealthy real estate investor enjoying the profits now, rather than later ... with only 2-5 properties instead of hundreds or overly priced properties. This book on investing in rental properties for beginners is the foundation of what I've built 47,000 person social media platform on - helping the average person get involved in rental properties on an average income, and building the cash flow of their dreams with 2-5 properties. That's it. This will teach you (the ordinary investor) how to tailor your investment strategy to your pocketbooks (and no one else's). You don't need to ask your parents or friends for loans because the best approach to building a rental portfolio is by purchasing units in modest neighborhoods that offer really high rents (i.e. purchase a \$44,000 rental that earns \$1200 a month in rents). If being a real estate investor is your dream and being a landlord is not, this is the book for you! The author will personally take you through the steps she's used on over 560 people to build their dream income and lifestyle.
