Provides step-by-step instructions on creating a writing program using rubrics, and includes lesson plans, forms, and scheduling guidelines.

At its best, educational television can provide children with enormous opportunities and can serve as a window to new experiences, enrich academic knowledge, enhance attitudes and motivation, and nurture social skills. This volume documents the impact of educational television in a variety of subject areas and proposes mechanisms to explain its effects. Drawing from a wide variety of research spanning several disciplines, author Shalom M. Fisch analyzes the literature on the impact of educational resources. He focuses on television programs designed for children rather than for adults, although adult literature is included when it is particularly relevant. In addition, much of the discussion concerns the effects of unaided viewing by children, rather than viewing in the context of adult-led follow-up activities. The role of parent-child co-viewing and issues relevant to the use of television in school or child care also receives consideration. This volume is intended to make the disparate literature on educational television's impact more accessible, by bringing it together into a centralized resource. To that end, the volume draws together empirical data on the impact of educational television programs--both academic and prosocial--on children's knowledge, skills, attitudes, and behavior. In addition to its emphasis on positive effects, this volume addresses a gap in the existing research literature regarding children's learning from exposure to educational television. Acknowledging that little theoretical work has been done to explain why or how these effects occur, Fisch takes a step toward correcting this situation by proposing theoretical models to explore aspects of the mental processing that underlies children's learning from educational television. With its unique perspective on children's educational television and comprehensive approach to studying the topic, this volume is required reading for scholars, researchers, and students working in the area of children and television. It offers crucial insights to scholars in developmental psychology, family studies, educational psychology, and related areas.

A brand new edition of this flagship work, that provides detailed descriptions of important text varieties in English along with methodological techniques to carry out analyses.

Persuasive essays, also called written arguments, are among the most common writing assignments and are used across the curriculum. Yet, despite their common use, many students struggle with the basics of creating a compelling, persuasive argument. Focusing on the four keys to persuasive writing, this booklet uses a step-by-step method to start with an assignment and end with a final draft. By following the clear examples and relying on the included templates, the writer will be able to generate a solid piece of persuasive writing on any topic. Table of Contents: How to Use This Booklet A Special Note about Rogerian Argument Step One: Understand the Assignment Step Two: The Working Outline Step Three: The Thesis Statement Checklist: Eight Things That Can Change Your Grade Step Four: The Introductory Paragraph Step Five: Body Paragraphs Checklist: How to Test Paragraph Organization and Development Step Six: Counter-Arguments Step Seven: Refutations Step Eight: The Conclusion Paragraph Step Nine: The Final Draft The First Layer: Revising Out Loud The Second Layer: Sentence Triage The Third Layer: "Find" Searches Fourth Layer: The Fine Points

Provides information on stylistic aspects of research papers, theses, and dissertations, including sections on writing fundamentals, MLA documentation style, and copyright law

Understanding and Evaluating Research: A Critical Guide aims to sensitize students to the necessity of learning how not to defer to the mysterious authority of the experts, but rather to learn how to be a critical consumer of others' research, and to gain confidence in their ability to be producers of research. Sue McGregor shows students how to be research literate, and how to find, critique and apply other people's scholarship. This textbook is grounded in a solid understanding of the prevailing research methodologies for creating new knowledge (philosophical underpinnings), which in turn dictate problem posing, theory selection, and research methods (tasks for sampling, collecting and analyzing data, and reporting results).
