Scribing Plastic Model Kits | Scale Model Shop

Re-scribing panel lines... the very term can make even the most experienced modelers cringe. The molds used for the Italeri 1:48 P40M-N: Kittyhawk Mk4 are the old AMT/ERTL ones and show some deterioration due to age. The fuselage is not to well formed and requires some remedial work; sanding filling and re-scribing of panel lines.

Scribing Panel Lines on Model Airplane Kits - WW2 Model ...

Cut a strip long enough to go around your model's fuselage;

Where To Download Scribing Panel Lines For Model Aircraft Paul Budzik

cut this strip in half with scissors somewhat raggedly along its length; remove the protective backing from the half strip so that the tape's adhesive is exposed; and apply the half strip of tape around your fuselage so that its straight edge is where you want the desired panel line.

Tech Tips: Scribing Panel Lines - Tsohost

In fact, in most cases it can begin even before you assemble the model. This is because the right time to pre-scribe our panel lines is when each part is easiest to work with (ie its not attached to other parts). We do this by using a scribing tool and lightly tracing over the existing panel lines, while the kit is still in pieces.

Plastic Model Scribers, Chisels & Scribing Templates

Usually the first step when scribing a plastic airplane model is to make smooth the parts to be scribed. You can start by shaving off as much detail as possible with a dull hobby knife (a sharp blade increases the chance of gauging into the surface). After shaving, finish the removal by lightly wet sanding with fine sandpaper (800-grit or finer).

Scribing Surface Details on Your Aircraft Model - Model Aces

The scalpel blades are also a good tool to use if you have to remove a panel and cut all the way through since it will only cut a very thin line and the panel will retain its full size / then a

Where To Download Scribing Panel Lines For Model Aircraft Paul Budzik

small styrene strip around the hole will make it all fit perfectly.

How to - Scribing Panel Lines - HyperScale Forums

A particularly difficult task in scribing plastic model airplanes is getting neat and parallel circumferential fuselage panel lines (i.e., panel lines that go around the fuselage), because it's very difficult to hold a metal straight edge at the correct location, and it can be difficult to avoid waves and wiggles if you apply strips of masking tape as a guide.
