The Sussexes have hired a producer for their Archewell Audio podcast, following growing questions about when they would release a new episode as part of their reported \$25 million Spotify deal.

This issue of Clinics in Sports Medicine focuses on athletic injuries in the military population. The young, active individuals participate in a wide range of athletic and military activities that results in high injury rates as well as extreme performance demands. Military sports medicine physicians have provided many advances in the care of athletic injuries in the past and continue to pursue this today.

From the start of operations in Iraq in March 2003 until mid-2009, ground troops from thirty-seven countries fought at the side of U.S. forces, with many more providing indirect support and assistance. These countries furnished significant military aid to the United States Army and performed vital missions relevant to combat, intelligence, reconstruction, and support operations. The participation of these coalition partners proved critical to the success of the overall mission. Allied Participation in Operation Iraqi Freedom examines the achievements and contributions of the allied nations that supplied ground troops to the U.S.-led coalition in Iraq during 2003-2009. It does not cover forces deployed to Iraq under the aegis of the United Nations or the North Atlantic Treaty Organization. The U.S. military’s experience in Operation IRAQI FREEDOM reconfirms the necessity of coalition building in modern warfare, even when the U.S. Army and Marine Corps ground forces shoulder the largest burden. This monograph offers separate sections on each coalition ally and presents basic information about deployed military forces and their general operational experiences in Iraq. It also provides a framework for more detailed histories to follow.

This issue of Nursing Clinics of North America, Guest Edited by Sharon Stark, PhD, RN, APN-C, will focus on Victims of Abuse, with topics including: Types of Abuse : Interpersonal Violence; Child Abuse; Elder Abuse; Bullying; Substance Abuse and Violence; Domestic Violence; Abuse in Nursing Homes; Nurses as Victims of Abuse; Issues of abuse in military deployment and military families; Abusive Behavior in the Workplace; The Relationship Between Abuse and Depression; Meeting the 2015 Millennium Development Goals With New Interventions for Abused Women; Community Services/Prevention; and Educational Considerations.
