mathematics course at
the University of
Northern Colorado.

This course serves both as an introduction to topics in discrete math and as the "introduction to proof" course for math majors. The course is usually taught with a large amount of student inquiry, and this text is written to help facilitate this. Four main

topics are covered:
counting, sequences,
logic, and graph theory.

Along the way proofs
are introduced,
including proofs by
contradiction, proofs by
induction, and
combinatorial proofs.

The book contains over
470 exercises, including
275 with solutions and
over 100 with hints.

There are also

Read Book

Teacher Edition

Investigate! activities

throughout the text to support active, inquiry based learning. While there are many fine discrete math textbooks available, this text has the following advantages: It is written to be used in an inquiry rich course. It is written to be used in a course for future math teachers. It is open
