People with autism may appear to daydream constantly or be unaware of people around them. Most children with autism prefer to play by themselves, and treat other people like furniture. The major symptoms of autism include: Communication Problems: Many people with autism are uncommunicative - they will not speak, gesture, or make facial expressions. When they do speak, the speech may be in a sing-song pattern or monotone (no variation in pitch, like playing a single note on an instrument).
