The Pied Flycatcher (Poyser Monographs) Arne Lundberg: T ...
The pied flycatcher is a small, flycatching bird, slightly smaller than a house sparrow. The male is mostly black on the upperparts and white underneath, with a bold white patch on the folded wing. Females are browner. It is a summer visitor and breeds mainly in western areas, spending the winter in West Africa.

Pied Flycatcher Bird Facts | Ficedula Hypoleuca - The RSPB
Pied Flycatcher (Alatalo et al. 1981, 1982a, 1984b). Polygyny frequency According to the Orians-Verner model some males monopolise resources which are essential for females. In Pied Flycatchers the most essential resource for females is likely to be a suitable nest site. Hence, if the Orians-Verner model is true, we should expect polygyny to occur most fre

Rauno V. Alatalo & Arne Lundberg

The European pied flycatcher is a small passerine bird in the Old World flycatcher family. One of the four species of Western Palearctic black-and-white flycatchers, it hybridizes to a limited extent with the collared flycatcher. It breeds in most of Europe and across the Western Palearctic. It is migratory, wintering mainly in tropical Africa. It usually builds its nests in holes on oak trees. This
