This paper examines the causes, processes, and outcomes of Belize's 2016-17 sovereign debt restructuring—its third episode in last 10 years. As was the case in the earlier two restructurings, in 2006-07 and in 2012-13, the 2016-17 debt restructuring was executed through collaborative engagement with creditors outside an IMF-supported program. While providing liquidity relief and partially addressing long-term debt sustainability concerns, the restructuring will need to be underpinned by ambitious fiscal consolidation and growth-enhancing structural reforms to secure durable gains.

This paper proposes that the Executive Board approve the disbursement of a third tranche of CCRT debt service relief to 28 of the 29 CCRT-eligible members, covering the period April 14, 2021 through October 15, 2021, given staff's assessment that sufficient financial resources are available.

Recent world events have created a compelling need for new perspectives and realistic solutions to the problem of sovereign debt. The success of the Jubilee 2000 movement in raising public awareness of the devastating effects of debt, coupled with the highly publicized Bono/O'Neill tour of Africa, and the spectacular default and economic implosion of Argentina have helped spur a global debate over debt. A growing chorus of globalization critics, galvanized by the Catholic Church's demand for forgiveness and bolstered by recent defaults, has put debt near the top of the international agenda. Creditor governments and international financial institutions have belatedly recognized the need for more sustainable progress on debt as an inescapable step towards economic recovery in many parts of the world. This book is intended to advance the dialogue around these issues by providing a comprehensive overview of the problems raised by debt and describing new and practical approaches to overcoming them. It will be the first in more than a decade to bring together under one cover the voices of prominent members of the international debt community. It will include pieces from the most relevant constituencies: from creditors (the IMF/World Bank, government lenders, private investors) to critics (debtor representatives, activists, and academics) and analysis from economists, bankers, lawyers, social scientists, and politicians. As contributions come from such leading thinkers across a range of disciplines, this book will offer a timely guide for understanding and influencing the debt debate.

First published in 1999, this volume, the first to be published in on Jubilee 2000, describes the plight of 52 of the poorest nations in the world and puts in detail the case for radical cancellation of past inert debt. The cost and benefit of this remission and the groundbreaking concordat of peoples and governments that could accompany it are examined in detail. It contains critiques of the economic bases of the World Bank and IMF approaches to debt management in developing economies, as manifested in structural adjustment programmes and their maintenance, misuse of excess reserves and the methods used to carry out restructuring and development projects. The British anti-slavery campaign saw a mobilisation of public opinion for a great cause. Using this as a source of inspiration, public opinion must again be mobilised for what amounts to the greatest opportunity for justice, compassion and forgiveness facing us all at the beginning of a new millennium.

Examines the international economy, and calls for First World Christians to apply ethical principles to an economic system from which they largely benefit

Nila Weaver has grown from naïve seamstress to full-blown fighter. Every humdrum object is her arsenal, and sex...sex is her greatest weapon of all. She's paid the First Debt. She'll probably pay more. But she has no intention of letting the Hawks win. Jethro Hawk has found more than a worthy adversary in Nila--he's found the woman who could destroy him. There's a fine line between hatred and love, and an even finer path between fear and respect.
