The one shown in the manual pic is the 8533, not the 8541 that I've got. Not sure mine's got a blue house button! - I'll check when I get home tonight, and maybe just send off for an 8533 if it hasn't - I'm beginning to wonder if they sent the wrong one with the TV.

My Toshiba CT 8541 remote does not have a set up or menu

- Before this remote controller is shipped from the factory, the initial setting (default) of the 24-hour display is established for the clock time display, but this can be changed to the 12-hour (AM/PM) display. * If you want to use the 12-hour time display, refer to the " Selecting the remote controller functions " section.

Cathodic protection (CP) is used to prevent corrosion on many buried and submerged metallic structures such as underground pipes and tanks. Periodic testing is required to ensure proper CP system operation, but many Directorates of Public Works (DPWs) do not have sufficient resources to conduct such tests regularly. Several companies have begun manufacturing remote monitoring units (RMUs) for CP systems. The technology allows personnel to monitor multiple CP systems from a central location so problems can be detected and repaired immediately. RMUs from three manufacturers were evaluated during Phase I of this study (FEAP TR 97/76) to determine their effectiveness. Only one of them performed successfully. During Phase II, RMUs from two additional manufacturers were evaluated. Results showed that both of the systems from Phase II performed successfully and are suitable for use at Army installations.
