For users familiar with the linux operation system you may proceed to edit the system manually. For users not familiar with linux and ASL, at the Linux CLI (command line interface) Type `sudo asl-menu` as the example below shows. `repeater@repeater:~$ sudo asl-menu`. This will load the AllStarLink configuration menu.

First, download the script to your Allstar system by: `wget http://hamvoip.org/downloads/write_node_callsigns.tar.gz`. Extract it. Then extract the files: `tar -zxvf write_node_callsigns.tar.gz`. Lurch for the first time to update the database. Write `./write_node_callsigns` in the command line. It 'll print on screen many lines, just let it finish.
